

I fully support satellite radio! I depend on the weather and traffic channels because my husband and I travel excessively on his job! This is the only radio i listen and will listen to since i pay for this service. Please reject NAB'S petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve. When I was listening to regular radio i was constantly having to change and find correct stations to get my weather and traffic information, if there was any available and in doing so find this very frustrating and hazardous when driving. With XM radio it is easy, hassel free and much more safer!

So PLEASE protect my right to listen to what I want!
